BESPOKE SOLUTIONS FOR ALUMINIUM

PARTITION SUITES

OVERVIEW - 23.8

sapal.com.au

FLEXIBILITY

Partitions are built on site allowing minor changes to design and layout to be easily accommodated with **NO EXTRA COST AND NO PROJECT DELAY** that comes from factory assembled systems.

TAILOR MADE

With so many profiles and interlocking shapes, Sapphire partitions can be configured in so many unique ways. This is a product that will excite any architect / designer.

COMPETITIVE PRICE

Sapphire partition frames can be used with standard drywall. Plasterboard, steel stud frames, glass and timber doors can be sourced locally. This ensures that Sapphire partitions are very price competitive.

SUPERFAST LEADTIME

Sapphire strives to deliver all standard sections within two to three weeks regardless of finish. (NB : for export markets customs procedures may delay delivery in some countries). Sapphire will ensure that challenging project schedules will not be compromised.

COMPLIANCE WITH BCA

Sapphire Partition Systems are designed to comply with Building Code of Australia (BCA) and in particular to AS1428.1-2009 and AS1288-2006 ensuring your fitout will comply with the relevant codes.

SPEEDY INSTALLATION

Sapphire aluminium is prefinished so that no touch up is required after installation. All necessary accessories are supplied as part of the system. Aluminium is light and easy to cut on site. Snap together profiles reduce construction and on site labour costs.

SUPERIOR SOUND RATINGS

Sapphire Partition Systems allow you to meet stringent sound ratings from RW36 - RW50

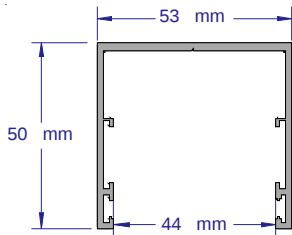

EXCITING RANGE OF ANODISED FINISHES

Anodising is the most durable and beautiful finish that can be applied to aluminium as it highlights and enhances the natural characteristics of aluminium.

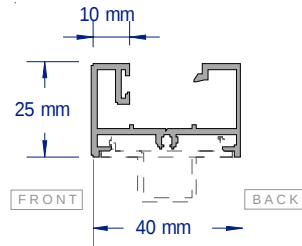

BEING GREEN

When you specify/purchase Sapphire partitions you are taking care of the environment as our products are made from recycled and primary aluminium. Combining this with an anodised finish you have a product that is 100% recyclable and free of harmful VOC's.

PLEASE NOTE: ALL OUR WIDELINE AND 76MM MAXLINE SECTIONS HAVE DIRECTIONAL POCKETS FEATURING SLIDE IN WEDGE. THIS MEANS THAT THE DOORSTOP CAN ONLY SNAP IN ONE WAY.

PLEASE ENSURE YOU INSTALL THE DOORFRAME CORRECTLY TO ENSURE THE DOORSTOP WILL CLIP IN FOR DIRECTION YOU WISH TO SWING THE DOOR. FOR INWARDS OPENING DOORS THE SLIDE IN WEDGE POCKET SHOULD BE AT THE FRONT OR CORRIDOR SIDE.

NOTE ABOVE IS INCORRECT AND WILL NOT ALLOW THE DOORSTOP TO CLIP IN
